

THE NETHERLANDS SEPT 2016

In September Dr Perrin was invited to the Dutch Osteopathic association's conference in Utrecht, which had the theme of diseases with Medically Unexplained Physical Symptoms also known as MUPS. It was interesting that many of the lecturers at the conference from all different medical disciplines were talking about patients with CFS/ME. When it was Dr Perrin's turn to speak the other lecturers realised that there was an explanation for many of the symptoms that they had discussed.

International Conference: An Integrative Approach of Medically Unexplainable Physical Symptoms (MUPS)

Dr Perrin outside the ultra modern medical conference centre in Utrecht.
